### Codedsoft Intelligent Universal Tracking System -> Codedsoft Tafuta

#### Codedsoft is providing a solid unique universal tracking and security system

Our intelligent module that can be put in a vehicle

- to track the location of the vehicle
  - to track the speed of the vehicle
  - for accident detection
  - for monitoring your entire business process
  - for fault detection
  - ideal module to help in traffic security
- 
- Constantly get the positions of your vehicle and the route it is following
  - Get the speed at which the vehicle is travelling. Overspeed will be reported
  - If your company has a lot of vehicles you can all monitor them at the same time
  - Know when your vehicle stops at anytime on the road.
  - We provide an App for Cellphones and your customers will know when a bus arrives at any destination
  - Ideal for the government for security control like speed control, accident detection. Any security violation is immediately reported by the device. This will reduce the number of accidents on the roads. Drivers will be warned by the device of overspeed. Frequent overspeeds will be reported and drivers will be levied fines.
  - There is a desktop software for management and monitoring purpose
  - We will provide a mean for information to be sent from the device to security personnel. This way if the driver is in threat of any danger he can enable the device to immediately send information to the nearby security personnel.

- Companies with lots of trucks and buses will find it easy to manage and monitor them
- Protect your stationed properties against theft
- If your vehicle is stolen it will be easy to track the location
- In case of accident, you will know immediately
- We provide you with the total distance covered
- You must not use our GPS device. Use your cellphone with the CsTrack App we provide for tracking. Car owners can use this to identify their car location and prevent theft.
- We provide an App that taxi's and small passenger transport buses can use. Customers can use this to locate the position of registered buses and taxis

### And then in the future version we will

- Get information about fuel consumption. You will see the level of fuel in your tank at anytime
- Detect faults on your vehicle in advance before they happen

### Testing
